

Bill # 259

I understand that the proposed Bill 259 would reduce the 1500 ft. circumference drug safety zone around schools, to 200 ft. This is one of those ridiculous bills I have heard about and is not something to pass muster, let alone the government conduciveness. I am sure there are plenty of other things to be done to keep children SAFE FROM DRUG USE, and this is NOT one of them. Unless the intension is to get more kids hooked on drugs.
